PROFILE

Passionate web and mobile developer with strong front-end and back-end development expertise and experience designing hybrid mobile applications (Flutter, Ionic, Angular, Spring, Node.js, Keycloak). Able to turn ideas into innovative digital products with a user-centered approach. Familiar with designing data collection and monitoring & evaluation systems, bringing a cross-cutting perspective between technical development and data use. Dynamic, adaptable and results-oriented.

PROFESSIONAL EXPERIENCE

IT Consultant and Developer 06/2025 – Present

CINERI, Dakar, Senegal

- Implemented centralized authentication and an OTP plugin for multi-factor authentication (MFA).
- Developed a custom theme for Keycloak.
- Project lead for the student registration management application (Spring Boot/Angular).
- Designed the accreditation management module for the academic placement management application (Spring Boot/Angular).
- Designed an application for managing diploma issuance for high school graduates (Spring Boot/Angular).

IT Consultant and Developer 11/2024 – 02/2025

TechCo, Dakar, Senegal

- Built a payroll management application.
- Integrated the Postmark API (emails) and SMS/WhatsApp APIs to notify users.

IT Consultant and Developer 06/2024 – 11/2024

Consi, Remote, Senegal

- Developed a mobile application (Flutter) for patients, integrating backend APIs.
- Redesigned the company website on WordPress.
- Integrated SMS/WhatsApp and OTP APIs for notifications, and the PayPal API (Node.js/Flutter) for ad management.

Web and Mobile Developer 02/2022 – 06/2024

Saou Transport, Dakar

- Developed and redesigned a mobile application (Ionic/Flutter); built for iOS via Xcode with Capacitor plugins, deployed to the App Store.
- Added a parcel management module (web) using Spring/Angular, deployed with Docker.
- Analyzed client needs, technical design, testing, maintenance and continuous optimization.
- Patient–healthcare professional matching platform: doctor search/geolocation, online appointment booking, account and notification management.

Web and mobile developer for an IoT-based transport application

Sn software, Dakar, Senegal 06/2021 – 05/2022

- Built interfaces and integrated APIs (Angular/Ionic); chose the microservices architecture and developed the gateway.

- Designed a mobile application (Flutter) and a parcel management module (Spring/Angular).
- Integrated a partner company's API for ticket purchases (Java Spring Boot/Angular).
- Statistics dashboard and real-time bus geolocation; application for an airline company (Odoo).
